 *Average cost of audit reports published under this topic is \$241,051.

This audit focused on how well the Township of Langley managed its drinking water supply infrastructure to meet current and future demand.

During the period this audit covered, the Township delivered the East Langley Water Supply project. We looked at the processes the Township had in place to manage this project, and we found that the Township was dedicated to ensuring its drinking water infrastructure meets the demands of its residents.

There were a few areas where we were able to find opportunities for the Township to improve its approach to cap-

ital project management in order to ensure the success of its drinking water supply infrastructure management. This report also includes recommendations related to project procurement, scheduling and project timelines, and asset management and water supply infrastructure.

The result of our performance audit process is a [substantial audit report](#), which we urge you to read in full, as it identifies good practices in some areas as well as other areas where the Township could make enhancements.

This is the second of two reports under this topic on the Township of Langley.
